

Family Medicine Clerkship Syllabus

Academic Year 2026–2027

Course Title	Family Medicine Clerkship
Course No. / Credit Hours / Level	OM 7010 / 4 Credits / OMS III
Term	Academic Year 2026–2027
Course Faculty Lead	Clare Donahue, DO

Course Instructor and Contact Information

Role	Name	Contact
Course Faculty Lead	Clare Donahue, DO Assistant Professor of Family Medicine	donahuec@westernu.edu
Co-Chairs, Department of Family Medicine	Anna Yeung, DO - COMP Associate Professor of Family Medicine	ayeung@westernu.edu
	Jenna Collins, DO - HCOM Assistant Professor of Family Medicine	jcollins@westernu.edu
Course Administrative Support	Majell del Castillo - COMP Manager, Department of Family Medicine	909-469-5252 mdelcastillo@westernu.edu
	Laura Hysell - HCOM Manager, Department of Family Medicine	541-259-0304 lhysell@westernu.edu
Office of Clinical Education	Refer to the Clinical Education Manual (CEM) for additional COMP and HCOM-specific contacts and routing. Preceptors may email compsite@westernu.edu (COMP) or compnw@westernu.edu (HCOM)	

Purpose of the Clerkship

Family Medicine provides comprehensive, continuous, and patient-centered care across the lifespan. The Family Medicine Clerkship provides students with supervised clinical experiences caring for patients in a variety of healthcare settings during a four-week rotation. Students participate in the prevention, diagnosis, treatment, and management of acute and chronic medical conditions while developing the clinical reasoning, communication, professionalism, and patient care skills expected of a physician in training.

Family physicians play a central role in preventive care, chronic disease management, continuity of care, care coordination, and patient-centered care. Consistent with the osteopathic philosophy of Western University of Health Sciences, students are expected to apply an osteopathic approach to patient care that emphasizes whole-person health, health promotion, disease prevention, and the integration of factors that influence health and disease.

Clerkship Learning Objectives

Upon successful completion of the Family Medicine Clerkship, the student will be able to:

1. Obtain accurate and focused histories and perform appropriate physical examinations for patients across the lifespan.
2. Develop prioritized differential diagnoses and evidence-based assessment and management plans for common acute and chronic conditions encountered in Family Medicine.
3. Incorporate preventive care, health maintenance, screening recommendations, and health promotion strategies into patient care.
4. Apply biomedical, clinical, behavioral, and population health knowledge, including current evidence and clinical guidelines, to clinical decision-making.
5. Communicate effectively and compassionately with patients, families, caregivers, and members of the healthcare team, including through organized oral presentations and clinical documentation.
6. Collaborate with patients, families, health care teams, and community resources to provide safe, patient-centered care.
7. Apply an osteopathic approach to patient care by incorporating whole-person assessment, health promotion, disease prevention, and consideration of factors that influence health and disease, including osteopathic structural assessment and manipulative treatment when clinically appropriate and supervised.
8. Demonstrate professionalism, accountability, and integrity; seek and incorporate feedback; engage in self-directed learning; and recognize the physician's role in patient safety, care coordination, and quality improvement.

Alignment of clerkship learning objectives to COMP/AOA core competencies, Entrustable Professional Activities, and WesternU program learning outcomes is provided in the appendix.

Clinical Expectations

The following expectations describe how the clerkship learning objectives are expressed in day-to-day clinical practice. Students are expected to actively participate in supervised patient care and function as contributing members of the healthcare team. Students function under appropriate supervision at all times in accordance with the Clinical Education Manual (CEM) and may not provide patient care independently.

Patient Care

- Obtain and document accurate histories.
- Perform focused and comprehensive physical examinations.
- Participate in the evaluation and management of acute and chronic medical conditions.
- Incorporate preventive care and health maintenance recommendations into care.
- Provide patient education and counseling when appropriate.

Clinical Reasoning

- Develop prioritized differential diagnoses.
- Formulate evidence-based assessment and management plans.
- Apply current clinical guidelines and evidence to patient care.
- Recognize patients requiring urgent or emergent evaluation and notify supervising physicians appropriately.

Communication and Documentation

- Deliver organized and concise oral presentations.
- Document patient encounters in accordance with site policies and preceptor expectations.
- Communicate professionally with patients, families, and health care team members.

Osteopathic Integration

- Apply an osteopathic approach to patient care through whole-person assessment and consideration of factors that influence health and disease.
- Identify opportunities for osteopathic structural assessment and osteopathic manipulative treatment when clinically appropriate and supervised.

Professionalism

- Arrive prepared and on time.
- Demonstrate accountability, integrity, respect, and responsiveness.
- Maintain patient confidentiality and comply with institutional and site-specific policies.
- Contribute positively to the clinical learning environment.

Feedback and Self-Directed Learning

To succeed in this rotation, students are advised to:

- Seek regular feedback from preceptors and members of the healthcare team and incorporate it into subsequent clinical performance.
- Proactively identify gaps in knowledge and clinical exposure and engage in self-directed learning throughout the rotation to address them.
- Utilize evidence-based references to support patient care and professional growth.

Clinical Experiences

Students should actively seek opportunities to engage in the full breadth of Family Medicine practice, including the following clinical experiences:

Care Across the Lifespan

- Pediatric patients, including well-child visits and management of common pediatric conditions.
- Adult patients, including health maintenance and management of common adult conditions.
- Pregnant and obstetric patients, including prenatal care, delivery, and postpartum follow-up.
- Older adults, including geriatric assessment, functional status, and polypharmacy.

Preventive Care

- Health maintenance, wellness, and well-child visits.
- Age-appropriate screening.
- Immunizations.
- Lifestyle and risk-reduction counseling.

Acute Care

- Evaluation and management of common acute complaints.
- Recognition of patients requiring urgent or emergent evaluation.

Chronic Disease Management

- Longitudinal management of common chronic medical conditions.
- Medication management and monitoring.
- Patient education and self-management support.

Undifferentiated Presentations

- Evaluation and management of patients presenting without a clear or established diagnosis.
- Developing a systematic approach to workup and management in the context of diagnostic uncertainty.

Mental and Behavioral Health

- Recognition and initial management of common mental health and behavioral health conditions, including depression, anxiety, and substance use disorder.
- Motivational interviewing and brief behavioral interventions.

Care Coordination and Team-Based Care

- Continuity of care and longitudinal patient management.
- Referrals and consultation.
- Transitions of care.
- Interprofessional collaboration.
- Identification of social determinants of health and barriers to care.
- Community resources and support services.

Procedures

Students should seek opportunities to observe or participate in common outpatient and inpatient procedures when available and appropriate to the clinical setting. Examples may include joint aspiration and injection, skin biopsy, wound care, osteopathic manipulative treatment, point-of-care ultrasound, and other common bedside procedures. Because procedural exposure varies significantly by site, students are encouraged to discuss available opportunities with their preceptor early in the rotation.

Clinical Site Variability

Clinical experiences vary by rotation site and may include outpatient, inpatient, or mixed practice settings. No single site provides exposure to every diagnosis, procedure, patient population, or clinical scenario encountered in Family Medicine.

Students are expected to achieve the clerkship learning objectives regardless of site structure and should supplement areas of limited exposure through self-directed learning. Because the COMAT emphasizes ambulatory Family Medicine concepts, students should intentionally review preventive care, chronic disease management, and outpatient clinical reasoning throughout the rotation.

Clinical schedules and site-specific expectations vary by preceptor and clinical setting. Students will receive scheduling information prior to or at the start of their rotation and are expected to adhere to the schedule established by their clinical site. Students should come prepared with a stethoscope and any personal medical equipment appropriate to their setting; additional site-specific requirements will be communicated by the preceptor.

Required Clerkship Activities

Pre-Rotation Orientation Session (4th Friday)

Students are expected to attend the Family Medicine pre-rotation orientation session, which reviews:

- Clerkship expectations
- COMAT preparation
- Available learning resources
- Strategies for success in a variety of clinical settings

Mid-Rotation Educational Session (2nd Friday)

Students are expected to attend the scheduled mid-rotation educational session focused on clinical reasoning, board-style questions, and review of commonly tested Family Medicine topics.

Additional Required Activities

Additional required clerkship activities will be communicated during the pre-rotation orientation session.

Assessment and Grading

Assessment, grading, remediation, and progression policies are governed by the Clinical Education Manual (CEM).

For OMS III core rotations, the final clerkship grade is determined by a combination of:

Component	Weight
Clinical Evaluation	70%
COMAT Examination	30%

Both the Clinical Evaluation and COMAT examination must be passing before a final grade can be assigned. Successful completion of all required clerkship activities is expected.

Students are encouraged to review the CEM for additional information regarding grading, remediation, grade disputes, and academic progression.

Clinical Evaluation

Clinical performance is assessed through direct observation and evaluation by supervising physicians and may include assessment of:

- Patient care
- Clinical reasoning
- Medical knowledge
- Communication skills
- Documentation
- Professionalism
- Teamwork
- Responsiveness to feedback

Students are encouraged to seek regular feedback throughout the rotation and discuss performance expectations with their preceptors early in the clerkship.

Clerkship Resources

The following resources are available to support clinical learning:

- American Academy of Family Physicians (AAFP)
- U.S. Preventive Services Task Force (USPSTF)
- Centers for Disease Control and Prevention (CDC)
- Bates' Guide to Physical Examination and History Taking (Bates' Physical Exam Videos available through the WesternU library)
- UpToDate
- Current specialty society guidelines as appropriate (e.g., AAP, ACOG, IDSA, SHM)

Students are encouraged to check with their clinical site for access to additional evidence-based resources, which may vary by institution.

COMAT Preparation

Students are encouraged to utilize question banks and board-review resources throughout the clerkship. Resources available through COMP may vary and will be communicated during clerkship orientation.

Policies

The Family Medicine Clerkship follows all policies outlined in the Clinical Education Manual (CEM), the University Catalog, and the College (COMP) Catalog. Students are responsible for reviewing and adhering to all applicable policies. Failure to complete required clerkship activities, professionalism concerns, or violations of academic honesty and integrity may affect successful completion of the clerkship and are addressed in accordance with CEM and Catalog policies.

The following policies are highlighted due to their importance during the Family Medicine Clerkship.

Attendance and Participation

Students are expected to attend all scheduled clinical activities and required clerkship sessions. Requests for time away from clinical duties must follow procedures outlined in the Clinical Education Manual.

Accommodations

Students seeking accommodations during clinical rotations should initiate the approval process through the Harris Family Center for Disability and Health Policy (CDHP) as early as possible, and prior to the Core Rotation Selection Process when feasible. Students must adhere to the enrollment and documentation procedures set forth by the CDHP to formally request accommodation. Refer to the CEM for complete information regarding the accommodations process, site-specific considerations, and student responsibilities.

Artificial Intelligence (AI)

Students are expected to comply with all University, College, clinical site, and CEM policies regarding the use of AI tools. Students who encounter AI-assisted documentation tools, including ambient AI scribes, which are increasingly common in both outpatient and inpatient Family Medicine settings, should discuss appropriate use, oversight, and documentation responsibilities with their preceptor before use. Students should be aware that the ability to document without AI assistance is a core competency and may be assessed during the rotation. Refer to the CEM for guidance regarding acceptable use, academic integrity, and patient confidentiality.

Clerkship Communication

Questions?	Contact
- Clerkship learning objectives - Clerkship expectations - Required clerkship activities - Student learning experiences (preceptors)	Course Faculty Lead <i>Copy campus specific Administrative Support on all correspondence</i>
Access to orientation materials or clerkship handouts	Administrative Support
- Scheduling/Time-Off Requests (TOR) - Evaluations/Grading - Remediation - Academic progression - Credentialing - COMP clinical education policies	Office of Clinical Education Submit a TDX ticket

• Supervision • Patient safety • Professionalism • Learning environment • Preceptor conflicts • Mistreatment	Submit a confidential TDX ticket per CEM reporting procedures
---	---

For a complete list of Clinical Education contacts, refer to the Clinical Education Manual.

Students are encouraged to provide feedback on their clinical experiences and training sites. Information obtained through student evaluations and preceptor feedback supports continuous quality improvement of the clerkship.

Appendix: Curriculum Alignment

The following tables align the Family Medicine Clerkship learning objectives (numbered 1–8 as listed in this syllabus) to COMP/AOA core competencies, Entrustable Professional Activities (EPAs), COMP Program Learning Outcomes, and WesternU Institutional Learning Outcomes.

AACOM Entrustable Professional Activities (EPAs)

Skills expected on your first day of residency.

EPA	Description	Learning Objective
EPA 1	Gather a history and perform a physical examination	1, 7
EPA 2	Prioritize a differential diagnosis following a clinical encounter	2
EPA 3	Recommend and interpret common diagnostic and screening tests	2, 3
EPA 4	Enter and discuss orders and prescriptions	2, 4
EPA 5	Document a clinical encounter in the patient record	5
EPA 6	Provide an oral presentation of a clinical encounter	5
EPA 7	Form clinical questions and retrieve evidence to advance patient care	4
EPA 8	Give or receive a patient handover to transition care responsibility	6
EPA 9	Collaborate as a member of an interprofessional team	6
EPA 10	Recognize a patient requiring urgent or emergent care and initiate evaluation and management	2
EPA 11	Obtain informed consent for tests and/or procedures	5, 8
EPA 12	Perform general procedures of a physician	7
EPA 13	Identify system failures and contribute to a culture of safety and improvement	8

WU Institutional Outcomes

WU Institutional Outcome	Health Professional Education	Learning Objective
1. Critical Thinking	The graduate should be able to identify and solve problems that require the integration of multiple contexts when performing patient care.	1, 2, 3, 4, 7
2. Breadth and Depth of Knowledge in the Discipline / Clinical Competence	The graduate should be able to perform appropriate diagnostic and therapeutic skills, to apply relevant information to patient care and practice, and to educate patients regarding prevention of common health problems.	1, 2, 3, 4, 5, 7
3. Interpersonal Communication Skills	The graduate should be able to effectively use interpersonal skills that enable them to establish and maintain therapeutic relationships with patients and other members of the health care team.	5, 6
4. Collaboration Skills	The graduate should be able to collaborate with clients and with other health professionals to develop a plan of care to achieve positive health outcomes for their patients.	5, 6, 8

5. Ethical and Moral Decision-Making Skills	The graduate should be able to perform the highest quality of care, governed by ethical principles, integrity, honesty, and compassion.	8
6. Lifelong Learning	The graduate should be able to engage in life-long, self-directed learning to validate continued competence in practice.	8
7. Evidence-Based Practice	The graduate should be able to utilize research and evidence-based practice and apply relevant findings to the care of patients.	2, 3, 4
8. Humanistic Practice	The graduate should be able to carry out compassionate and humanistic approaches to health care delivery when interacting with patients, clients, and their families. They should unfailingly advocate for patient needs.	5, 7, 8

COMP/AOA Core Competencies

COMP/AOA Core Competency	Learning Objective	Competency Description
1. Osteopathic Philosophy and Osteopathic Manipulative Medicine	7	Residents on their first day of residency are expected to demonstrate and apply knowledge of accepted standards in Osteopathic Manipulative Treatment (OMT) appropriate to their specialty. The educational goal is to train a skilled and competent osteopathic practitioner who remains dedicated to life-long learning and to practice habits in osteopathic philosophy and manipulative medicine.
2. Medical Knowledge	1, 2, 3, 4, 5	Residents on their first day of residency are expected to demonstrate and apply knowledge of accepted standards of clinical medicine in their respective specialty area, remain current with new developments in medicine, and participate in life-long learning activities, including research.
3. Patient Care	1, 2, 3, 5, 7	Residents on their first day of residency must demonstrate the ability to effectively treat patients, provide medical care that incorporates the osteopathic philosophy, patient empathy, awareness of behavioral issues, the incorporation of preventative medicine, and health promotion.
4. Interpersonal and Communication Skills	5, 6	Residents on their first day of residency are expected to demonstrate interpersonal and communication skills that enable them to establish and maintain professional relationships with patients, families, and other members of health care teams.
5. Professionalism	6, 8	Residents on their first day of residency are expected to uphold the Osteopathic Oath in the conduct of their professional activities that promote advocacy of patient welfare, adherence to ethical principles, collaboration with health professionals, life-long learning, and sensitivity to a diverse patient population. Residents should be cognizant of their own physical and mental health in order to effectively care for patients.
6. Practice-Based Learning and Improvement	4, 8	Residents on their first day of residency must demonstrate the ability to critically evaluate their methods of clinical practice, integrate evidence-based medicine into patient care, show an

		understanding of research methods, and improve patient care practices.
7. Systems-Based Practice	6, 8	Residents on their first day of residency are expected to demonstrate an understanding of health care delivery systems, provide effective and qualitative patient care within the system, and practice cost-effective medicine.

Comparison of Outcomes Standards: WU and COMP

WU Institutional Outcome	WU	COMP
Critical Thinking	1	1, 2, 3, 6
Breadth and Depth of Knowledge in the Discipline / Clinical Competence	2	1, 2, 3, 4, 5, 6, 7
Interpersonal Communication Skills	3	4
Collaboration Skills	4	4
Ethical and Moral Decision-Making Skills	5	1, 3, 5, 6
Lifelong Learning	6	1, 2, 3, 6, 7
Evidence-Based Practice	7	1, 2, 3, 6, 7
Humanistic Practice	8	3, 4, 5
